

Practical Ideas for Housing Searches

One of the toughest tasks for private refugee sponsors is finding appropriate, affordable housing for the newcomers they sponsor. They want to ensure newcomers can continue to rent their new homes after Month 13 without any major disruption or need to move. While that means a link to employment, it can also involve other challenges.

Join us at this workshop to learn more about community mapping to assist in identifying appropriate rental units, how to use a real estate agent, and how to negotiate leases.

Consider staying online for 30 minutes after the workshop to share ideas and learn from other sponsors about their best practice. Our goal is always to connect, learn and share.
